

## DID YOU KNOW...

July 2008

**Energy Efficiency Tip of the Month** – Check your furnace filter every month, especially during heavy use months (winter and summer). At a minimum, change the filter every three months. A dirty filter will slow down the air flow and make your system work harder – wasting energy. A clean filter also prevents dust and dirt from building up in the system.

Be a volunteer! The **Wine and Harvest** committee is looking for people like you to volunteer a few hours to help with the festival. Check out the activities at [www.wineandharvestfestival.com](http://www.wineandharvestfestival.com). **Support your community!**

Have a great summer. Contact Village Hall for further information at 269-657-3148 or e-mail one of us at [www.pawpaw.net](http://www.pawpaw.net).
